Lab 6: Code Coverage Report

Name: P T Mounika

SRN: PES1UG24CS311

Section : F

Repository: L6_L7_06_event_ticket_tier

Files Used

- Application: event_ticket_tier.py
- Test file: CodeCoverageTest_event_ticket_tier.py
- Screenshot: code_coverage.png

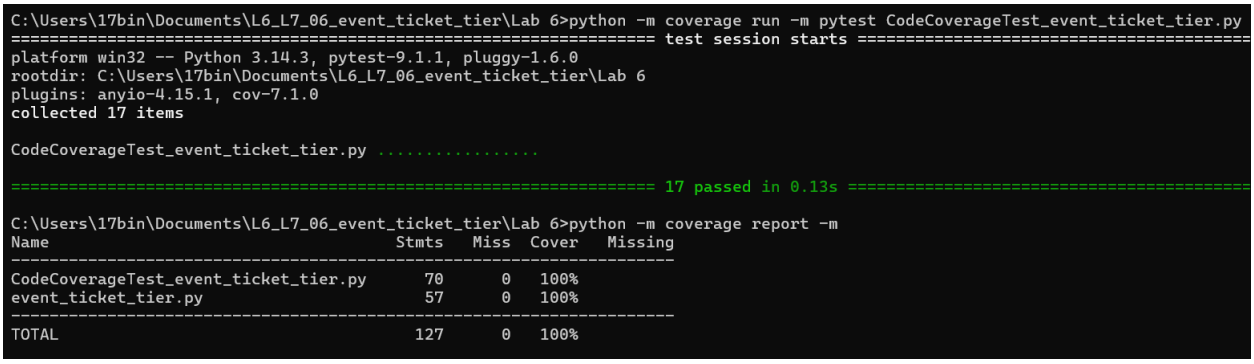

Commands Used

```
python -m coverage run -m pytest CodeCoverageTest_event_ticket_tier.py
python -m coverage report -m
```

Coverage Progress

Stage	Tests	Coverage of event_ticket_tier.py
Starter test only	1	51%
After batch 1	7	63%
After batch 2	13	79%
After batch 3 (final)	17	100%

Screenshot

What Each Test Covers

- test_single_general_order: the basic confirmed general-tier order (starter test)
- test_manifests_not_a_list, test_negative_tax_rate: invalid input raises ValueError
- test_unconfirmed_manifest_skipped: unconfirmed manifests are skipped
- test_vip_tier_price, test_premium_tier_price: VIP and premium seat prices
- test_invalid_tier_rejected: an unknown tier is rejected
- test_zero_quantity_order_rejected: orders with quantity 0 are rejected
- test_vip_fraud_risk_zeroes_manifest: FRAUD_RISK on a VIP manifest zeroes the total
- test_general_fraud_risk_order_rejected_but_manifest_continues: FRAUD_RISK on a non-VIP tier rejects only that order
- test_earlybird_discount: the EARLYBIRD promo applies a 20% discount
- test_bulk_discount_five_or_more: quantity of 5 or more gets a 20 discount
- test_exclusive_lounge_fee: the exclusive lounge adds a 75 fee
- test_audit_rejected_too_many_rejections: more than 4 rejected orders gives AUDIT_REJECTED
- test_gate_flow_no_data, test_gate_flow_overflow, test_gate_flow_normal_with_streak_reset: all paths of monitor_gate_flow

Conclusion

Line coverage rose from 51% to 100% by adding 16 tests, so every line of the application code is executed by the tests.
